AHLTA
Teamwork, Efficiency, Coding

LCDR W.P. McCullough, MC, USN

MD, MBA, FAAP

AHLTA: What does it mean anyway?

- AHLTA (Aw Heck Lets Try Again)
- “HALTA”
- It is a proper name? Then why is it all capitalized?
- You want us to “use” it as a proper name? Fine but what does it mean anyway?
- Armed Forces Health Longitudinal Tracking Application
- Whose idea was this?

AHLTA Misconceptions:

- It will make us more productive.
  - It is a documentation tool, not a productivity tool.
  - It can improve healthcare, but at a cost.
  - It will not fix an inefficient clinic.
- We won’t need coders any longer.
- Dr. McCullough Designed it.
  - I did not design it.

AHLTA Truths

- I have to uses it to see patients too.
- I am not currently a full-time provider.
- As a full-time provider and department head at a small hospital I was forced to implement P-GUI and see 25 patients a day.
- When AHLTA is down during my clinic I hate it and my patients receive worse care.
- AHLTA is evolving just as CHCS Legacy did.

AHLTA:

- Benfits:
  - Medical records availability
  - Population Health (macro and micro level)
  - Point of Care Decision Support
- Costs:
  - Time (implementation, learning curve, documentation)
  - Effort (overcoming organizational and individual inertia)

Objectives:

- Provide you with tools to help you use this system as individuals and as a team.
- Leave you with the screen shots in this presentation for a reference.

Front Desk Procedures

- Both systems are needed
  - CHCS Legacy – Demographics and 3rd Party Insurance Verification, future appointment creation.
  - AHLTA – Check-in, Telcons, Walk-in appointment creation.
- Telcon Transition
  - Telcons can only be seen and completed in the system that they are initiated. Each clinic must carefully coordinate the transition to AHLTA for Telcons. Forwarding Telcons between clinics also must be coordinated.
  - Completed AHLTA Telcons are available in Previous Encounters.
- Communication with healthcare team via the Comment field

Patient Flow in Clinic

- How to communicate without paper charts (Flags, Flip Cards, Comment Field)
- Minimizing trips to waiting room
  - Vital Sign Area vs. Vitals in the Exam Room
    - Dictated by physical spaces and support staff.
    - Exam room provides support staff with the ability to document in AHLTA and privacy for screening questions.

Junior Corps Staff

- Vitals
- S/O documentation
  - CC:/ROS/Past Med Hx/FHx/SHx, Developmental History
  - (HPI must be documented by Provider)
  - AHLTA strategies

S/O

SO Note Written by USER, TEST @ 10 Feb 2006 1008 EST

Reason for Visit
Reason for Visit is Not Deployment-related

History of present illness
The Patient is a 9 year old female. Source of patient information was mother ▪ Past medical history reviewed Reviewed Autocite Content

Allergies
An allergy: Reviewed Allergy Information in CHCS

Past medical/surgical history

Reported History:
Reported prior tests: No prior tests were performed.
Reported medications: Medication history: Reviewed Autocite Content

Medical: No previous hospitalizations and no previous emergency room visit.
Environmental exposure: No secondhand cigarette smoke exposure.
Surgical / procedural: Surgical / procedural history: Reviewed

Diagnosis History:
No acne

Personal history
Behavioral history: Not smoking.
Habits: Exercising regularly.
Family: Child cared for at home. Child not cared for by a babysitter and is not cared for by a relative. Child enrolled in day-care.
Functional status: No mental disability and no physical disability.

Family history
No cancer
Heart disease
No early deaths
No genetic disease.

Review of systems
Systemic symptoms: No lethargy. Fever. No recent weight change.
Eye symptoms: No mucous discharge from eyes and no purulent discharge from eyes.
Otolaryngeal symptoms: No earache. Nasal discharge and nasal passage blockage.
Cardiovascular symptoms: No chest pain or discomfort.
Pulmonary symptoms: Feeling congested in the chest. No dyspnea and not expressed as feeling short of breath. Cough. No wheezing.
Gastrointestinal symptoms: No vomiting, no diarrhea, and no constipation.
Skin symptoms: Dry skin. No skin lesions and no rash.

Assessment
- Hypertension
- No asthma
- No hyperlipidemia
- No diabetes mellitus

Encounter 1547 SO Note was saved.

Edit vs. New S/O Note

- Coding issues
  - MHS and AMA coding rules allow support staff to document CC:, PMH, Family Hx, Social Hx, and ROS.
  - E&M calculator will count elements completed by support staff with is appropriate if limited to these areas.
- Note flow
  - Edit Note results in a better flow of S/O section, but clutters the change history section.
- Inconsistencies and Duplications
  - New Note risks both
- Do not use different AIM forms with Edit Note as previous documentation my be masked in the S/O module.
- Edit, Delete and New note all retain clear documentation of who documented what.

Efficiency Tips for Provider Documentation

- Encounter Templates with order sets
- Default template

Do Not Move Encounter Templates out of the Enterprise Folder!!!

- Bug in the system allows any user to “move” a template out of the Enterprise Encounter Template folder, making it unavailable to other users.
- Only a few people in each of the 3 services can restore the template to the Enterprise Folder after it has been moved.

Navy Template Naming Convention:

- DESCRIPTION--SPECIALTY--MTF--INITIALS--DATE
  - Capitalized, double dashes without spaces.
  - Description limited to 10 characters and may include spaces.
  - Specialty limited to 4 characters
  - MTF
    - NHL = Naval Hospital Lemoore;
    - NMCSD = Naval Medical Center San Diego;
    - NHCL = Naval Hospital Camp Lejeune;
    - (NAV = Navy Enterprise level templates)
  - Initials 2 or 3 characters
  - Date in format 020405 (04 February 2005)

Navy Template Naming Convention

- Specialties

Symbol	Specialty
DERM	Dermatology
ENT	Otolaryngology
IM	Internal Medicine
PC	Primary Care
PEDS	Pediatrics
SURG	General Surgery
URO	Urology

Coding

- Provider Tips
- Communication with Coders/Auditors
  - Tasking module (Due 28 APR)

Coding in AHLTA

- An E&M code and ICD-9 (diagnosis) code are required for a provider to sign and complete an encounter.
- CPT-4 (procedure) codes, modifiers and extenders are not required.
- Providers who have not coded before will be required to code now.

Coding – E&M Codes:

- Defaults Encounter type
  - Acute or OPAC = Outpatient service type
  - Well = PrevMed Eval and Mgmt
  - System will search for appointment to same MEPRS code in past 3 years, if present = Established
  - Providers must understand when to change these defaults or will risk lost RVUs
- E&M Code Calculator:
  - AHLTA is a documentation tool that will count structured items in HPI, ROS, PEX to determine an E&M code
  - Poorly developed templates and AIM forms will generate low E&M codes. (ROS elements)
  - You must know when it under or over-codes and how to change it (URI visit should not get a 99214).

Comments:
When multiple procedures, other than EM services, are performed at the same session by the same provider, then the primary procedure or service may be reported as listed. The additional procedures or services may be identified by appending the modifier "-51" to the additional procedure or service code(s). This modifier should not be appended to designated "add-on" codes.

Coding Process:

- Providers become default coders; Coders become auditors and educators
- AHLTA writes to ADM
- Auditors can make changes to ADM but those are not written back to AHLTA. Auditors can not make changes to coding in AHLTA.

Current guidance:

- **“It is understood that when codes are changed in ADM, they will differ from the codes in CHCS II for that encounter. This will remain the case until functionality is created to allow ADM to write changes back to CHCS II. As stated above, ADM remains the system of record for coding purposes. CHCS II will be the system of record for outpatient medical records documentation.”**

BUMED Guidance for: INTEGRATION OF CHCS II INTO MTF CLINICAL and BUSINESS PRACTICES 24 August 2005
